Africa Programme on Accelerated Improvement of Civil Registration and Vital Statistics (APAI-CRVS)
Translating political commitments into action

Raj Gautam Mitra
Chief, Demographic and Social Statistics
African Centre for Statistics
UN Economic Commission for Africa

INDEPTH SCIENTIFIC CONFERENCE 2015
11-13 November 2015
Addis Ababa Ethiopia
Civil Registration

Continuous, permanent, compulsory, universal recording of the occurrence and characteristics of vital events in accordance with the legal requirements in each country

Priority vital events for Africa as decided by the Ministers
- Live Birth, Death, Marriages and Divorce
- Causes of Death also to be recorded with death event
WHO Counts Series 2007

• Scandal of invisibility – Many Africans are born and die without leaving a trace in any legal record and official statistic

• The single most critical failure of development over the past thirty years
CRVS and Good Governance

CRVS

- Individual
- Legal documents
- Realizing human rights

Community
- Identity management
- Improving service delivery

Aggregate
- Vital Statistics and COD Statistics
- Evidence-based policy making

Good Governance
- Improving service delivery
- Realizing human rights
- Legal documents
- Vital Statistics and COD Statistics
- Evidence-based policy making
APAI-CRVS — a short history

2009 - First seeds sown in Dar-Es-Salam
2010 - First conference of ministers (COM) responsible for CR in Addis Ababa
2011 - First of the five ASSD focusing on CRVS
2011 - Regional CRVS Core Group established
2012 - Heads of State approve COM as a permanent forum under AUC
2012 - Second COM in Durban
2013 - Tools for assessment and planning developed and a pool of African CRVS experts developed
2014 - The first comprehensive assessment begins in Botswana
2015 - Third COM
APAICRV$S – guiding principles

✓ Promoting country ownership and leadership;
✓ Promoting coordination between CR Offices, National Statistics Offices, Health Ministry and other stakeholders at country levels;
✓ Promoting phased-based, holistic, systemic and integrated approach;
✓ Establishing strong partnerships and coordination at regional and country levels;
✓ Building capacities of national CRVS institutions;
✓ Promoting innovations and knowledge sharing
APAI-CRVS — implementation framework

UNECA (Secretariat)
Regional CRVS Core Group*

Development of public good documents and training
In-country Technical Assistance
Knowledge generation & sharing
Supporting Regional forums
Monitoring and Evaluation

Countries

* AUC, AFDB, UNICEF, UNFPA, WHO, UNHCR, Statistics South Africa, INDEPTH, PARIS 21
APAI-CRVs — country status on assessments

Already conducted an assessment

Preparing/ in the process of assessment
Senegal, Madagascar, Mali, Mauritania, Cameroon, Cote D’Ivoire Zimbabwe, Gabon, Rwanda, Benin (10)
APAI-CRVS — major successes

✓ Obtained and sustained political support
✓ Successfully promoted country ownership and leadership
✓ Successfully promoted an systemic and holistic approach
✓ Significantly improved in-country and regional coordination
✓ Developed African pool of experts, and tools and guidance
✓ Provided technical support to countries in assessment/planning
✓ Trained a large number of CRVS functionaries (at least 500)
✓ Innovative approaches adopted for regional coordination
✓ Successfully organized 3 ministerial conferences and 4 ASSDs
✓ Created a global momentum on CRVS
APA1-CRVS — key challenges

- A number of countries have not done assessments and/or plans
- No mechanism yet in place to review the quality of assessments and plans
- The knowledge sharing and monitoring portal not yet functional
- Sustainable capacity development strategy not yet developed
- Monitoring system not operational
- Not enough technical resources available at the regional level on various technical fields (Causes of death, ICT, Law, Vital Statistics)
- Donor coordination
- Secretariat is thinly resourced
APAI-CRVS
some common challenges in countries

- Lack of demand for registration
- High cost of registration
- Distance to registration centres
- Colonial law with only incremental changes
- Lack of linkages between systems (e.g. - with health, national id)
- Inappropriate organizational arrangement
- Incorrect and inefficient business processes
APAI-CRVS
some common challenges in countries

- Inappropriate use of technology
- Poor service delivery
- Insufficient training of staff
- No performance monitoring or supervision
- Vital statistics not compiled
- Causes of death system does not exist or inadequate
- Poor archiving system
Strategy on Mortality Statistics
Ministerial Resolution in 3rd COM

- African Ministers February 2015:

‘...Recognizing that the Ebola epidemic has shown that the need for death registration and real time cause-of-death information is no longer optional but critical;

....Call upon WHO, in collaboration with Pan African Organizations and other partners, to intensify their efforts in developing real time death registration and causes of death information systems at country level’

The APAI-CRVS has developed a Africa Mortality Statistics Strategy
Country Strategies for improvement of Mortality Statistics

- Hospital deaths with causes of death; notified to CRVS system coded for national and national statistical use
- Community deaths recorded with causes of death on a nationally representative basis – linking with CR
- Household Surveys and Census

Technical Support from INDEPTH
Regional Strategies for Improvement of Mortality Statistics

- Scalable and integrated technical projects
- Country capacities and regional expertise
- Plans for designing mortality statistics systems
- Norms, standards, guidance
- Knowledge development and sharing
APAI-CRVS – a few key messages

➢ There are no perfect systems - there is always scope for improvement

➢ Review the CR and related laws

➢ Identify low hanging fruits – small changes may help quick wins

➢ Make CR services accessible – move information not people, may not need creation of separate structures

➢ Make CRVS inter-operable

➢ Introduce appropriate technology – but get the business process right
The three most important ways of establishing an efficient and sustainable CRVS system are coordination.
Thanks
